The EUROGIA2020 goal is to support and promote international partnerships developing innovative projects in low-carbon energy technologies.

EUROGIA2020 is a bottom-up, industry driven, market oriented programme which addresses all areas of the energy mix, from renewable energy to efficiency, and reduction of carbon footprint of fossil fuels.

In this Call, projects within the Low-carbon field scope or contributing to clean Energy solutions are welcome.

For this call, you are invited to submit a “Project Outline” (PO), which is the first step of the Eurogia submission process. In this case, the proposal can be simplified, as opposed to the Full Project Proposal (FPP) to be submitted in the second step. The Consortium will have the chance to present the PO at the Eurogia Technical Committee meeting which will happen 2nd half of September, through a 20’ presentation followed by a Question/Answer session, in order to get the recommendations from the experts. The relevant Public Authority representatives are also invited as observers. [Templates](#) of the PO document and presentation can be found on the Eurogia website.

Making a project proposal for the upcoming Call is easy, register to the Submission Tool <https://eurogia.eurestools.eu/>, upload the Project Proposal and indicate the main topical areas you do address.

Your first steps:

It is highly recommended to contact the Cluster offices and the dedicated Public Authorities of your countries in an early stage of your proposal idea to get the best support for your project idea and to find opportunities to meet project partners. The Clusters organize regular Events and Proposers Days to bring together the national authorities and the cluster communities to exchange on project ideas.

Please have a look at the [EUROGIA proposers guide](#).

SCOPE

Eurogia: Clean Energy and decarbonizing technology

The digital incorporation into the energy industry and services along its value chain is an indispensable part of energy transition, thus a priority for our cluster. We are looking to become the ultimate clean, intelligent and distributed energy ecosystem hub.

Who can participate:

- any type of businesses (SMEs or large enterprises)
- universities or research organizations

By participating in a EUREKA Cluster Project (ECP), you benefit from:

- access to national R&D funding,
- an international network of companies including key industry players,
- guidance, coaching and monitoring of your project by the Cluster office
- low administrative requirements
- High quality proposals evaluated by the Eurogia Cluster will receive a Eureka Cluster Project Label.

Supporting Countries

It is highly recommended to contact the Cluster office of Eurogia and the dedicated Public Authorities of your countries in an early stage of your proposal idea to get the best support for your project idea and to find opportunities to meet project partners. The Clusters organize regular Events and Proposers Days to bring together the Public Authorities and the cluster communities to exchange on project ideas.
